EDUCATION

M.TECH IN DESIGN ENGINEERING

2025 – 2027

BITS Pilani

BACHELOR OF ENGINEERING IN ELECTRICAL & ELECTRONICS

Aug 2013 – May 2018

GSSSIETW, Visvesvaraya Technological University

PGCTL, ATHE LEVEL 6 DIPLOMA IN TEACHING

Feb 2022 – Feb 2024

SURAASA

SKILLS

- Additive Manufacturing & 3D Printing
- CAD Modeling
- Finite Element Analysis (FEA)
- Mechanism and Robotics
- Woodworking
- Arduino-based projects
- Makerspace tools
- Adobe Photoshop
- HTML, CSS, JavaScript
- Inquiry-based, student-centred learning design
- Classroom management & virtual teaching
- Excellent communication skills

LANGUAGES

English, Kannada & Hindi

WORKSHOPS FACILITATED

- T Works – Great Innovation Challenge (20 hrs, 2 Phases)
- Sreenidhi Ignite (Hackathon & Makaton)
- MYP Design SAIBSA – 2024

PROFILE

I am an IB-certified MYP/DP Design and Technology facilitator with an M.Tech in Design Engineering and a B.E. in Electrical & Electronics Engineering, combining over 7 years of experience across engineering, industry, and education. With a strong passion for integrating technology, creativity, and problem-solving, I design meaningful inquiry-based learning experiences that empower students to think critically and connect learning to real-world applications.

My hands-on expertise spans woodworking, additive manufacturing, CAD modelling, finite element analysis, mechanism design, and electronics – applied both in engineering practice and in the Makerspace classroom. I teach IB DP Design & Technology (HL/SL) and serve as a Personal Project Supervisor, fostering student agency and independent design investigation from concept to realisation.

WORK EXPERIENCE

Sreenidhi International School

2022 – PRESENT

MYP/DP Design & Technology Facilitator · Personal Project Supervisor

- Deliver IB DP Design & Technology (2 years, HL/SL) and IB MYP Design (5 years), covering structural systems, electronic systems, and user-centred design aligned with the first-assessment-2027 DP syllabus.
- Serve as Personal Project Supervisor, guiding students through independent design investigations from problem identification through prototyping to final presentation.
- Lead woodworking, additive manufacturing (3D printing), and CAD-to-prototype pipelines in the Makerspace; guide students through material selection, joinery, and fabrication from digital model to physical object.
- Design and implement MYP Design units around arduino-based electronics, sustainable design challenges, upcycled fashion, and community-centred problem solving aligned with IB standards.
- Facilitate innovation workshops including T Works – Great Innovation Challenge and Sreenidhi Ignite Hackathon, extending design thinking beyond the classroom.

Byju's Future School

2020 – 2022

STEM Instructor

- Delivered engaging online STEM lessons globally, teaching Python, JavaScript, and other programming languages through block-based and text-based coding activities.
- Guided students in developing creative projects including games, animations, chatbot development, and introductory AI models; fostered logical thinking through algorithm-based challenges.

CERTIFICATIONS

- IB MYP DESIGN CAT 2
- Child Development, Learning Styles & Taxonomies
- Using Technology for Teaching & Learning
- Lesson Planning
- Assessment & Evaluation Techniques
- Learning Theories & Teaching Strategies
- Questioning Skills & Techniques
- PGCTL, ATHE Level 6 Diploma in Teaching
